CITIZENS EMERGENCY BREIFING FILM

A request has been received to endorse this showing and assist where needed to host.

"2026 was a record-breaking year of drought and five heat waves. It follows 2025 which was very similar and suggests that our climate has now changed irrevocably. A truly alarming thought given that 2027 is likely to be even hotter due to El Nino kicking in. Trees around here have shed all their leaves in the last couple of days. What next given that we are still pumping CO2 into the atmosphere?

"Longden and Bayston Hill parishes are planning a joint event aimed at alerting residents to the Climate and Nature crisis and offering some ideas on things we all can do to help turn things around. Central to the evening will be a showing of "Citizens' Emergency Briefing" a film that is introduced by Chris Packham. The date is **Wednesday 27th January 2027. T**he showing will take place in Bayston Hill Memorial Hall. Janet Cobb of Middle Marches Community Land Trust will be available afterwards to lead a discussion and we hope to recruit more volunteers for the local nature recovery projects already running or being planned."
